

Delock HDMI KVM Switch 4K 60 Hz with USB 3.0 and Audio

Description

This KVM switch by Delock is a convenient solution for connecting **two computers** with HDMI output **to one HDMI monitor**.

Peripheral devices

Furthermore, two USB 2.0 ports for a mouse and keyboard, and **two USB 3.0 ports** for a hard drive or USB memory can be connected.

Flexible Control

The active computer can be selected by mouse gesture, keyboard hotkey, button on the device or infrared remote control.

Note

KVMs emulate a standard wired 104 key keyboard and wired generic 2 or 3 button scroll wheel mouse on their respective console ports. Whether or not a wireless or gaming mouse and keyboard work with KVM switches depends on several factors; in general, most wireless mice and keyboards do not support working with KVM switches. We recommend to use a standard wired mouse and keyboard with our KVM switches.
